As we understand the doctors, you can live much longer if you quit everything that makes you want to.

106-106-103

It's kind of corny, a lot of people say, to think in terms of "gentlemen" or "gentlefolk" because its 19th century or even further back than that.

Now there are a lot of corny things left over in the 26th Century and there are a lot of corny things among 'em. But ever since Cervantes wrote of the fabulous "Don Quixote" in the 16th century, sincere gentility has, as he was, been scoffed at, attempt at nobility has, by the worldly wise, been held in contempt, and ridiculed as naive and insane.

Most amusing is the assumption upon the cynic's part that, pardon the expression, gentility is apart from the world. And it is presumptuous, as well as envious, to assume a "gentleman" chooses his way only out of environment or conformity. It is possible to choose, because it happens to be favorable even in a crass decade of the mid-20th Century. And it doesn't have to be snobbish, except in view of the fact that the average beholder has difficulty telling real from unreal, understandably because there's so much hokum anyhow.

Many people say what first comes into their mouth, not in their head. If someone doesn't conform to their conformity, quash them, but do it skillfully, 20th Century style behind backs and through innuendo.

The little Uvalde Bulletin, which actually represents a private concern, recently put out a cover feature, quoting Cardinal Newman's Definition of a Gentleman.

Here it is:

One who . . .  
Never inflicts pain.  
Makes everyone at ease and at home in his presence.  
Doesn't bring up topics that might cause irritation to another.  
Makes light of favors while he does them.  
Never gossips or slanders.  
Never takes unfair advantage of another.  
Is never mean in disputes, but always fair and generous.  
Never gives out sharp sayings for argument.  
Bears no malice.  
Is kind to another intellect inferior to his own.  
Is always just.  
Is always indulgent.  
Respects weakness in human nature and makes the proper amends.

## Shell's Nell Ross

### Wildcat Drilling

#### At 15,197 Feet

The Shell Oil Company's deep wildcat in eastern Milam County, the No. 1 Nell Ross, was at 15,197 feet on Tuesday and was preparing to drill ahead after the drilling crew had spent two or three days fishing for junk lost in the hole. The Smackover wildcat is now permitted to 16,930 feet. The original permit was for 15,000 feet.

Reportedly the Ross was cored several times last week and also had logs run to 15,187 feet.

In the Rice Schoolhouse area the shallow wildcat drilled by the Brown & Smith Oil Company of Houston on the Henry Pattillo tract was still waiting on electric power line to be completed before being put on pump. Plans were being ahead, however, for more drilling on the lease block, and reportedly four more locations for shallow tests have been staked.

## WeedClean-UpUrged

### By Fire Marshal

Cameron Fire Marshal John Eanes Wednesday stressed the need for citizens and property owners to clean up vacant lots throughout the city.

Many lots are grown up with weeds and are not only a place where mosquitoes flourish but are also a fire hazard, Eanes noted.

Cleaning the vacant lots and property of unoccupied homes would be instrumental in reducing fire losses through the hot summer months, Eanes added.

Letters have been sent to out-of-town property owners asking for their assistance in the clean-up project.

eron Industrial Foundation. Caperton is new president and Wells is vice president of the foundation. —Stafffoto

## Caperton, Wells To Head Industrial Foundation

Cameron Industrial Foundation officers, to head the drive for industry as related in the recent Town Meeting, were elected Tuesday with Narvie Caperton and Bob Wells filling the post of president and vice president.

The men will head the fifteen man group of directors in activating plans for an organized and working Industrial Foundation with goals toward bringing new industry and boosting present industry in the Cameron area.

Henry Siehman, Texas Power & Light manager, has accepted the duties of secretary-treasurer of the foundation.

The Foundation meeting followed findings revealed at last week's Town Meeting in which views from every segment of Cameron progress were discussed by some 250 persons interested in seeing Cameron grow.

## Growers To Appear

### On Dub King Show

Eighteen persons involved in the Milam County Junior Broiler Show will appear on the Dub King television Show at 5 p.m. Saturday.

Growers, sponsors and members of the Chamber Poultry Committee are making plans to attend, according to Mrs. Barbara Smitherman, CC manager.

Poultry Committee members who will attend are: Leo Fuchs, J. D. Moore and Bill Arthur.

Milam growers who will appear on the show are: Richard Vaculin, Della Laywell, Sandra Barta, Jennifer Kostroun, James Ray Zelisko, David McClaren, Kathleen Urban, Arthur Jistel, Alfonse Schoppe, Michael Schoppe, Melvin Hollas, Leon Hollas, Wayne Jistel, Clifford Jistel and Melanie McClaren.

## CC Endorses Elm Creek Project

The Elm Creek Watershed Project drew the endorsement of the Cameron Chamber of Commerce during their monthly board meeting Monday.

E. A. Perrin spoke to fellow Chamber directors concerning the advantages of the proposed watershed project. Directors voted to back the watershed project and appointed three chamber directors to represent them at a Commissioner's Court meeting. Chamber president Forrest Sapp, Bob Wells and Henry Siehman were appointed.

Officials of the Elm Creek Watershed will meet with Milam Commissioners Court 10 a.m. June 24 to discuss the possibility of Milam County's maintaining 16 structures proposed for the watershed.

Perrin, secretary of the Elm Creek Authority, said delegates are also being invited from the Cameron Rotary and Lions Clubs, the Bursley Creek Water District and Rockdale.

A Legal Committee was appointed to draft the by-laws of the Industrial Foundation with County Attorney John B. Henderson Jr. and County Judge Don Humble serving as co-chairmen.

The by-laws are to be completed for the next Industrial Committee meeting scheduled for June 29.

Bill Burns was elected chairman of the Finance Committee with A. W. McCullin Sr. co-chairman.

The Finance Committee will recommend the par value of shares to the board, showing the minimum amount of investments, and advise the board on the goal set for the fund. They will also formulate plans for a sales campaign.

The finance committee will also have the responsibility of establishing a guideline for disbursing foundation funds.

This part of the Finance Committee's work will be set up before the June 29 meeting.

In order to keep the public informed, a publicity committee was appointed with Eugene Smitherman, chairman, and Frank Luecke, vice chairman.

R. T. Adams Named Franklin School Superintendent

Assistant Superintendent R. T. Adams has accepted a position as school superintendent in the Franklin Public Schools and will assume his new duties July 1.

Cameron school trustees accepted his resignation last Thursday during the regular board meeting.

Adams will succeed C. A. Reynolds in the Franklin School. The assistant superintendent came to Cameron four years ago. He is a native of Carlton and received his degree from North Texas State University.

While in Cameron Mr. Adams has served as school counselor in addition to his work as assistant superintendent. Among his extra duties he headed the steering committee that surveyed needs for additional vocational courses in Cameron. He has also been active in civic work. He and his wife are members of the First Methodist Church.

Classes will be open for children ages 6 to 12 years. Rev. Bonhard said proper supervision for children would be guaranteed. The children are asked to bring a notebook and pencil with them.

Night courses for teenagers and adults are also under consideration.

## Children Offered Summer Courses At Marak Hall

### German and Czech languages

Instruction, piano, ping pong and tennis lessons will be offered Milam and area children at the Marak Community Center, according to Rev. George Bonhard.

Rev. Bonhard, who will direct the lessons, said the classes would be held each Saturday and Wednesday from 8 a.m. until 12 noon. The courses will be given free of charge and every child interested is invited to attend.

Classes will begin Saturday, June 19, at Marak Hall. Registration for the tennis courses will also be held at that time.

The classes will be open for children ages 6 to 12 years. Rev. Bonhard said proper supervision for children would be guaranteed. The children are asked to bring a notebook and pencil with them.

Night courses for teenagers and adults are also under consideration.

## City Council Holds Monthly Meeting

During a brief meeting Tuesday night, City Councilmen authorized the sending of two Cameron firemen to the A&M University firemen's school. The school will be held July 25 through July 30.

Attendance to the firemen's school will qualify Cameron for a 3 percent credit on fire insurance key rates, according to John Eanes, Fire Marshal.

The council also authorized the payment of the new sewer extension that is being installed in the south part of Cameron.

## Tax, Bond Proposals Gain Approval In Light Vote Saturday

Voters in the Cameron Independent School District approved the tax and bond assumption proposals in last Saturday's election. A small number of 39 voters cast their ballots in the special election.

The tax election and bond assumption election was held in accordance with requirements as a result of the annexation of the Marak Common School District. The procedure followed action by the Milam County Board which approved annexation of the Marak District to the Cameron I.S.D. April 12.

The Maintenance Tax proposal drew 36 votes for and two against. The Bond Assumption proposal drew 37 votes for and one against. Of the 39 votes, 38 were counted, according to election judge Felix Matula Jr.

Supt. Charles Zeigler said the vote will cause no change in the current tax structure in the Cameron I. S. D., but would bring the Marak District into the same tax structure as the Cameron I. S.D. The tax rate is \$1.50 per \$100 valuation.

Supt. Charles Zeigler said the vote will cause no change in the current tax structure in the Cameron I. S. D., but would bring the Marak District into the same tax structure as the Cameron I. S.D. The tax rate is \$1.50 per \$100 valuation.

## School OK's New Improvement Plan

### Little League

#### Benefit Features

#### Rotarians, Lions

Cameron Rotarians and Lions Club members will try once again to do their bit toward promoting the Cameron Summer Recreational program.

Saturday they will throw their professional dignity to the wind when they take to the baseball field in the benefit game. An earlier scheduled game was cancelled due to weather conditions.

This year's performance promises to be equally entertaining as last year's when old and young alike enjoyed the unusual type of ball played by unusual looking characters.

It will be most likely that you will not be able to tell your dentist, doctor, teacher or dry goods owner from that of a circus clown.

But it will all be in the name of fun and a boost to the finances of Cameron's Summer Baseball program.

This program provides activities for over 200 Cameron youngsters during the summer months. Their equipment, uniforms and insurance are a part of the expenditure of creating such a program. Several business concerns have furnished new shirts, caps and baseball socks this year in helping to promote the program.

Game time is set for 7:30 p.m. at the Little League Field. Every one is urged to come out and support the baseball program while enjoying an evening of delightful entertainment.

The Board also accepted the resignation of Assistant Superintendent R. T. Adams (see related story). Mrs. Carol Henson, second grade Ben Milam teacher and OJ Thomas coach and math instructor Tommy Burns also resigned their positions.

INTER-COM SYSTEM

Supt. Zeigler announced that a new inter-communications system has been installed in OJ Thomas School. The system is similar to those installed in Ben Milam, Yoe High and Ada Henderson Schools.

All of the inter-communications systems were made possible by the generous gift of Dr. W. R. Newton, Zeigler said.

Trustees authorized Frank Kemble, Yoe High principal, and Mrs. Herbert Nune, science instructor, to draw up specifications to re-model and re-equip the Yoe High

location near Ross and First Sts. in Waco and the City of Rosebud, was developed to make right-of-way available for construction of Interstate Highway 35. It will also accommodate urban renewal plans of the City of Waco and campus development plans of Baylor University.

"In the face of combined Highway Department and community plans, no feasible plan is available that would allow the railroad to continue to provide service between Rosebud and Waco," Nelson added.

It will be necessary for Southern Pacific to file an application with Interstate Commerce Commission for authority to abandon the 37 miles of track and facilities.

The application will be filed this week and will include the proposal for the rail right from Caldwell to Cameron.

If the Interstate Commerce Commission approves eliminating the line, Southern Pacific proposes to continue serving Cameron and Rosebud by using Santa Fe trackage between Cameron and Rosebud. This would also require Interstate Commerce Commission approval.

"Public use of the rail service between Waco and Rosebud has been slight. Even though cutting out the line between Waco and Rosebud would reduce the company's losses, the operation between Cameron and Rosebud would remain marginal.

AFFECT BUSINESSES

Southern Pacific presently operates one freight train in each direction daily, except Sunday, between Waco and Cameron. They service some 18 to 29 businesses in the Cameron area which include Walled Lake Door Factory, McLane Wholesale, fertilizer companies and others.

"This plan will not affect these patrons and in many instances could save a day by coming into Cameron through Caldwell," Nelson said.

At present the cars originate in many sections of the country or on the coast and come into Hearn. Southern Pacific takes the freight to Waco and on to Cameron over a span of about 70 miles. Coming straight into Cameron from Caldwell is 30 miles which cuts off some 40 miles. Freight coming in from San Antonio and points south would save an additional 30 to 40 miles.

## Yoe Science Lab Tops Project

The long-range school improvement program was pushed forward last week as trustees authorized various new equipment and remodeling to up-date facilities and academics in the Cameron schools.

Plans for the Yoe High School science laboratory, homemaking facilities, speech programs, reading laboratory and more new aluminum windows were the major topics of discussion at the regular meeting at Ben Milam School. All proposals gained unanimous approval.

The Board also accepted the resignation of Assistant Superintendent R. T. Adams (see related story). Mrs. Carol Henson, second grade Ben Milam teacher and OJ Thomas coach and math instructor Tommy Burns also resigned their positions.

said the proposal is a result of a study conducted by all school principals and teachers in the grades to be affected. Ada Henderson, Principal Herman D. Brown coordinated the study.

The Board also approved the addition of a speech program as an elective course for the 8th grade students. The new subject will be available for the 1965-66 school year.

Supt. Zeigler said this would strengthen the elective program and is a result of a study and recommendations by Mr. Brown and Mrs. Barbara Hughes, who will be instructor.

Bids for additional aluminum windows in Yoe High and Ada Henderson schools were also called for.

## Double Ring Ceremony Unites Miss Crawford, Mr. Klement

ROGERS — Miss Anita Elizabeth Crawford and Howard W. Klement, son of Rogers, were united in marriage Saturday, June 12, at 11 a.m. at St. Monica's Catholic Church in Cameron. The Rev. Paul McCullum performed the double ring ceremony.

The bride is the daughter of Mr. and Mrs. Wayne Crawford of Rogers. The bridegroom is the son of Mr. and Mrs. Frank Klement of Rogers. The bride was given in marriage by her father, the church was decorated with baskets of gladiolas and gerberas. The bride wore a traditional floor length gown of Chantilly lace over tulle with a fitted bodice, scalloped neckline studded with crystal sequins, long tapered sleeves and a full tiered skirt sweeping to a rail waltz chapel train.

Her elbow length veil was attached to a crown of seed pearls and crystals. She carried out the tradition of something old, something new, by wearing blue garters with tatted lace edging made and given to her by her great aunt, Miss Martha Kinsey of Benalis. She wore a single strand of pearls, a gift of the groom. Her bouquet was a cascade of carnations and streamers centered with a white orchid.

The maid of honor was Miss Patricia Kostroun of Austin, cousin of the groom. Bridesmaids were

Janet Cable of Temple and Jeanette Klement, Rogers, sister of the groom. They wore matching street length dresses of pale pink lace and chiffon over peau de soie, matching shoes, long white gloves and headpieces of matching chiffon and taffeta rosettes over tulle. The carried nosegays of pink carnation cascades.

The best man was Leroy Klement, brother of the groom. Groomsman were Jimmy Crawford, Rogers, brother of the bride, and Martin Jistel, Cameron, cousin of the groom. Ushers were C. L. Kirksey of Austin, cousin of the bride, and Lawrence Klement, brother of the groom.

The reception was held in Simon-George Hall in Cameron. The table was covered with pink net cloth to carry out the bride's chosen colors, and centered with the bride's bouquet and the bridesmaid's nosegays. A three-tiered wedding cake was served with pink punch from crystal appointments. In the houseparty were Miss Doris Craft of Rogers who registered the guests; Mrs. Bernard Allen, aunt of the bride, who served punch; Mrs. George Collier, cousin of the bride, who served the cake; Mrs. Louise Kostroun, Austin, Mrs. Hugo Hollas, Cameron, Mrs. Jerry Kostroun, Cameron, all aunts of the groom; Mrs. Richard Jistel and Mrs. Hubert Jistel, all aunts of the groom; Mrs. Dale Paschal of Houston, Mrs. Dan Canterbury of Austin, Mrs. Walter Urubek of Temple, Mrs. C. L. Kirksey of Austin; along with others who helped to serve the barbecue dinner to the wedding party, relatives and friends of the couple. A wedding dance was held in Flag Hall.

The bride is a 1965 graduate of Rogers High School. The groom is a 1969 graduate from Rogers High School and is employed in Temple by International Harvester Company.

The couple will be at home at 3109 Shady Hill Drive, Temple.

## Milam Farm Bureau Plans Queen Contest

Applications for contestants in the Milam County Farm Bureau Queen Contest will be accepted at the Farm Bureau office here through July 1.

Queen contestants must be single and the daughter or sister of a Farm Bureau member actively engaged in agricultural production in Milam County. Queen contestants will be judged on grace, poise, charm and vivaciousness.

Milam County's queen will receive a gift and \$50 cash prize and will be eligible to compete in the District contest. The State winner will be awarded \$500 and a trip to the National Convention in Chicago.

Farm Bureau officials said the contest was held to recognize the beautiful farm and ranch girls.

## Ceremony Unites Gerick - Anderle

Miss Canelia Frances Gerick, daughter of Mr. and Mrs. Joe Gerick, and Mr. James Anthony Anderle, son of Mr. and Mrs. Antone Anderle, were married Friday, June 4, at St. Monica's Catholic Church.

Burning white tapers in gold candelabra behind baskets of gladiolas, daisies and palms flanked the altar for the ceremony performed by the Rev. Paul McCullum.

The bride was given in marriage by her father. She wore a floor length gown of ivory peau de soie with appliques of Alencon lace. A tracery of pearls accented the neckline. Her floor length veil was of French illusion and she carried a bouquet of white rosebuds.

Miss Joyce Smalley and Mr. Carol Richter were honor attendants. Bridesmaids were Miss Abbie Gayle Batte and Miss Gail Williams of Dallas. Groomsman were Stanley Kirk and Phillip Hubnik. Ushers were Jimmy Woodum and Johnny Richter.

The bride's attendants wore gowns of yellow peau de soie with matching hats.

The bride's mother wore a green silk sheath with matching jacket and the groom's mother chose a dress of beige linen. They wore white carnation corsages.

A reception was held at the John S. Batte home where baskets of white gladiolas and daisies decorated the party rooms.

Miss Marilyn Graham registered guests.

The bride's table, laid with yellow net over floor-length satin, was centered with hurricane lamps entwined with lily-of-the-valley.

Members of the houseparty were Miss Carol Ann Wilson, Miss Margaret Nance, Miss Patti Hightower, Miss Rebecca Harden, Mrs. Bobbie Hilman and Mrs. Gary Welch of Houston.

Before her marriage the bride attended Abilene Christian College. Mr. Anderle is a senior at Texas Tech at Lubbock. Both are graduates of Yoe High School.

Dr. and Mrs. George Bowman left Houston by plane Monday on a 5-day Mexican tour.

## PERSONALS

Mrs. B. C. Cluck of Texas City spent a week with her sister, Mrs. Oscar Story. Also visiting Mrs. Story were her two nieces, Mrs. T. E. Saldham.

Otis Arnold, Mrs. Charles Knappenberger and son Mark of Texas City.

## How to freeze the rising cost of living

An electric freezer is like having your own super market right in your home! You can buy seasonal specials when prices are low; store them in your freezer and serve later when the same food may cost twice as much. It's easy to freeze fruits and vegetables, too. No mess. And you always keep that wonderful garden-fresh flavor. It's mighty handy when unexpected guests arrive because you'll always have extra food available.

Yet an electric freezer costs only pennies a day to operate, thanks to low-cost rural electric power.

## ELECTRIC FREEZER

Take advantage of low summer prices on many foods and meats. Store them in your electric freezer or refrigerator-freezer and serve later. Another good way you live better with rural electric power!

Pigs

By Vern Sanford  
In that rolling, cedar-studded countryside northwest of San Antonio there roams a peculiar game animal which most Texans don't even know exists.

It is the Russian hog! It's a mean vindictive beast with the proverbial chip on its shoulder.

Probably the foremost authority on wild Russian hogs in Texas is retired game warden Bob Snow of Kerrville. His talented pack of dogs has chased game throughout Mexico and the United States. With Snow hot on their heels, his dogs have trailed many dangerous animals including jaguar and mountain lions.

Of the Russian hog Bob says: "A big Russian hog is the meanest, ornierest critter on four feet."

He should know because he's killed over 100 of them personally. He also says there is no other game animal which can match the Russian hog in sheer stamina and speed. When cornered it is a kill-crazed fighter. It doesn't know what "quit" means.

This animal's artillery is impressive. Long, wicked tusks curl backward from the lower corners of its mouth.

When cornered the hog tenses its head wildly, lashing about with the tusks as if they were razor-sharp sabers. Which they virtually are! Many a careless dog has drawn its last breath after bring-

ing one of these hogs to bay.

A spooked hog never seems to tire. It isn't unusual for a hog chase to range over 10 miles or more of terrain.

Like most creatures of the wild, when confronted with danger, the Russian hog would rather flee than fight. But once the occasion arises, it will turn with a viciousness seldom seen in any other game animal.

Snow carries a small snare kit in his hip pocket on every hunt. It's almost an expected thing that at least one of his dogs will get laid open before the hunt ends. When this happens, Bob gets off his horse and administers first aid, patiently stitching the dog together. All his dogs carry scars of battle.

These accidents occur, Snow explains, simple because dogs are neither fast enough nor elusive enough to evade the charge of a belligerent hog.

A Russian hog can lash out so swiftly and so suddenly that it is difficult to follow the action by eye. One instant the hog is backed up against the brush; the next instant dogs are flying in every direction, tossed aside like a bowling ball scatters pins.

A Russian hog is a mean-looking critter. It is muscular and lean in the hips, has a protruding snout, sharp tusks and coarse hair. It prefers a hilly habitat and roams furtively through the underbrush where it seldom is glimpsed by human eyes.

Only practical way to hunt them is with trained dogs.

No one knows exactly how these

to tell about the time he was on the trail of an extremely large hog, in the 400-pounds-plus class. This happened on a hunt near Boerne, northwest of San Antonio. Five times the dogs brought the hog to bay. And five times Bob blasted it pointblank with his .45 pistol! Yet the hog refused to die.

Finally it eluded the hounds, killing two of them in the process. Snow never did bring that hog in. However, deer hunters found it two weeks later some distance away, where it had wiggled under a brushpile to die.

On another hunt a hog had one of its hind legs shot off, yet it managed to run for six miles before the dogs finally brought it to bay.

We repeat - Russian hogs are mean . . . and tough!

One legend has it that many years ago a traveling wildlife exhibit passed through San Antonio and included in the display were several of the European or Russian hogs. The owner of the small exhibit was down on his luck and wanted to dispose of his animals. So he sold them to a rancher who wanted to crossbreed the wild hogs with domestic stock.

But the hogs eventually escape or were released. No one knows for sure. Anyway, they scattered into the hills. And from that inconspicuous start, they soon began multiplying and expanding their range.

Ranchers claim a Russian hog is one of the worst pests ever to roam the woods. A big oxenry one will tear down fences, root up crops and actually kill domestic

Here's evidence that Russian hogs are tough and difficult to hunt. It's a tale Bob Snow likes

### County Agent's Notes

## McClaren Elected Dairy President

By J. D. Moore

H. L. McClaren of Cameron was elected president of the Heart of Texas Dairy Herd Improvement Association at their annual meeting June 8 in Ledbetter Park. Milton Sturn of Holland was elected vice-president and Bill Howell of Caldwell, secretary-treasurer.

Directors for the association are Bob Gray and Milton Sturn, Bell County; G. F. Dunston and H. L. McClaren, Milam County and Bill Howell and Louis Schoeneman of Burleson County.

The annual meeting is an all day meeting with a barbecue lunch at noon. The association is made up of dairymen of Bell, Milam and Burleson Counties. According to the June report there are 14 dairy herds with 1453 cows in the association. Charles McDermott of Cameron is supervisor for the group. The purpose of the association is to afford the individual dairy-

man an economical method of obtaining information he can use to improve the producing efficiency of his herd. The records of identification, production, feed cost and income enable the dairyman to cull the least profitable cows to feed the rest according to their production requirements, and to select the most suitable animals for breeding up the inherent producing ability of his herd. Thus, keeping accurate feed and income records is an important part of the record keeping program. These services are performed by the supervisor working with the dairyman.

The program of the annual meeting was a discussion of dairy records by J. W. Davis, Extension Dairyman in charge of record work at A&M University. Billie Ellis, local Dairyman and Charles Henson, Ass't County Agent, showed slides and discussed a trip they made to South America.

Guests at the dairy day were Rev. Dick Freeman, Miss Anna Marie Ramke, Mrs. J. D. Moore, Mr. and Mrs. Bill Wolverson, Ronald Bailey, Mary Martin and Mrs. Bill Harris and daughters.

**NEW DAIRYMAN**-Mr. Gerritt Van Noord from Winnie, Texas has recently bought the Billie Ellis Dairy farm, cattle and equipment. Mr. Van Noord plans to enlarge the present dairy barn and increase the number of cows in the present Ellis herd. We welcome the Van Noord family to Milam County.

### Guar Recommended In Area As Cash Crop, Rotation Crop

By John Tate

WUC. SCS. ROSEBUD

Guar could be the answer to some of our financial problems in this area, according to a long talk with John W. Stewart, field man for General Mills, Inc. Guar Plant in Kennedy, Texas. He says, and quotes experiences of farmers in other areas, that Guar, when used in a rotation with other row crops, has proved to be a life saver during the past 14 years in many sections of the state. His records show substantial increases in production of row crops following the growing of Guar. This alone makes it attractive to people who are interested in adding a summer legume to their Conservation Crop Rotation and reap a cash crop all in one season and in one operation.

Mr. Gene Klein, who farms west of Burlington, grew some Guar locally last year. He plans a considerable acreage of Guar this year. He also has some neighbors who plan to try some for the first time this year. Considerable interest has been shown in this crop, both from the cash return standpoint and from the fact that it is a legume. We have hundreds of acres of land which would be better off to have something like Guar growing on it this summer than for it to be bare of protective cover.

Guar is strictly a summer legume and can be planted and harvested with the same equipment used for Grain Sorghum. No additional equipment is necessary or needed. There is a good supply of seed available and a ready cash market for the 1965 crop, according to Stewart. He says that General Mills, Inc., demands for Guar continues to increase and that farmers in the growing area

are making a profit as well as planting a legume on their land.

Guar, a deep-rooted legume, offers farmers a cash crop replacement for acreage which is fallowed, planted to summer peas and the like. Guar for commercial bean production qualifies as an approved substitute crop on Feed Grain and Cotton-Program layout land. This item should be cleared with each farmer's local ASC office to see just how it would affect him.

Marketing of bean production is done through locally established Grain dealers where the acreage planted justifies setting up a dealer to buy Guar. Stewart points out that growers can expect \$1.50 per cwt, less the freight rates in carload lots to the Kennedy plant. He says further that yields in this area under average to good conditions will yield 800 to 1200 pounds of beans per acre.

## Keep This Stride Strong....

Let the sleeping giant rise and walk. Daily, it becomes fact that Cameron, a prospective giant of small-city development, stirs and tests its legs.

A Town Meeting, intense with concern, electric in anticipation, reflected upon this community's historic promise, its basic problems. And decision, reckoning with controversy, went out with some 225 men and women clearly wanting to share the responsibility to build.

That was Tuesday, June 8. These things since have occurred.

**SCHOOL**--Cameron School Board approval of installation of a complete, new YHS science lab, institution of reading lab for grades 1 through 6, a speech course (elective) for eighth grade, transfer of homemaking department to separate quarters in residence near YHS Campus, move of YHS athletic quarters to former homemaking department, availability of varsity locker-rooms for use of physical education students and junior high athletes, additional frames of aluminum windows for school buildings, and installation of intercom system at O. J. Thomas.

**INDUSTRY**--Election of permanent Cameron Industrial Foundation officers (one-year terms) and plan in two weeks for final phrasing of Foundation by-laws for final non-profit incorporation.

**CIVIC IMPROVEMENT**--Review of costs of razing the block west of the

courthouse and reworking the downtown streets, proposed in 1963, throughout mid-town Cameron, appointment of a liaison representative from Cameron Chamber board of directors to meet regularly with City Council, Chamber board approval of some program to level the block west of the courthouse, and Board decision to take stands on proposals vital to Cameron's growth.

**CITY**--Continued work on the Airport extension project north, review of possibilities of downtown improvement, among other projects.

**AGRICULTURE**--Chamber representatives joining the East Texas Chamber's BIG-BET farm tour in Milam County, bringing some 70 East Texas farmers to view the Anton Moraw farm in Milam County and other key agriculture features in the McLennan-Bell-Milam area. Chamber resolution of endorsement for the proposal of Milam County maintaining flood control structures of the proposed Elm Creek Watershed and other watersheds in the county.

If, in the space of nine days, that is not a giant step, what is? All these things, of course, did not spring into existence since Town Meeting, but Town Meeting pointed the absolute desire for action. And this, by golly, is action.

Let the sleeping giant rise? Indeed, help the giant keep this measured stride strong.

## Motivation...

The fact that it has been somewhat difficult to recruit youngsters from poor families for part-time jobs in the the Federally - sponsored neighborhood Youth Corps here is not altogether surprising.

The chief aim of this program is to reach deep into pockets of community poverty to try to rescue at least a few of those whose environment threatens to consign them to what Labor Secretary Wirtz has called the "slag heap" of unemployed and unemployable youths. Their most critical disability is lack

of clear and sustained motivation toward self-improvement. The hope is that supervised work experience, in the parks, hospitals and elsewhere, will begin to give them the "feel" of opportunity and the path to advancement.

The fact that response is not easily evoked from among the hundreds and thousands of youngsters who are known to lack such opportunity serves only to underscore the need. More aggressive recruiting -- aimed, indeed, at the least responsive--ought to be the very essence of this enterprise.

## Dateline Austin Million Voters Less In '65 Signup

By Vern Sanford

**AUSTIN**—Number of registered voters in Texas dropped nearly a million from last year's record breaking number, according to figures released by Comptroller Robert S. Calvert.

Most of the decrease apparently came in the 50,000 to 150,000 cities, with the largest metropolitan areas and the rural counties holding fairly steady. Number of issued poll tax receipts and exemptions dropped from 2,392,670 for voting in the 1964 presidential elections to 1,970,381 for this off-year.

The five most populous counties - Harris, Dallas, Bexar, Tarrant and El Paso - actually increased their percentage of the registered vote by three points. They held 44 per cent of this year's poll tax receipts.

However, this is not a specific indicator of their dominance over rural areas, since in cities of less than 10,000, elderly voters do not have to claim their exemption.

This year only 3,314 signed up for "Free" poll tax receipts qualifying them to vote in elections for federal officials. But there are no federal elections slated for ballots this year. A total of 84,297 of these "poll tax-not paid" certificates were issued in 1964, first year they were available for presidential, vice presidential and congressional balloting.

As voting dates for constitutional amendments near, it is apparent that most Texans of voting age will be able to do no more than look and hope, for lack of a poll tax receipt.

**INSURANCE RATES UP** - State Board of Insurance Chairman Hunter McLean jolted auto owners with more bad news: their insurance premiums are going up at least 12 per cent.

Board meets officially on June 22 to set rates on basis of experience by areas. However, McLean already has served notice that there is no doubt rising motor accidents will make a stiff rate like mandatory. There were 13 per cent more accidents last year than in 1963.

Rates dropped 1.2 per cent last year for the total insurance field, but should have gone up, McLean said. Auto liability insurance, although sometimes criticized as high priced, actually has cost companies more than \$1,000,000,000 during the last 10 years, he maintained.

Premiums vary in 26 rating territories of the state according to their accident records the previous year.

**BOUNDARY AGREED ON** - Conference have agreed on location of the boundary line between Texas and Louisiana, long in dispute, reports Land Commissioner Jerry Sadler.

Next step will be appointment of a boundary commission by governors of the states to approve the new line and submit it to their legislatures for concurrence. Congress also will have to ratify the line.

Dispute has involved some valuable mineral lands. Louisiana claimed ownership to the west bank of the Sabine River and Sabine Lake into Gulf of Mexico. Texas claimed its line extended to the middle of the river and lake.

**MIGRANT AID PUSHED** - Governor's Office of Economic Opportunity is seeking approval of a \$5,500,000 grant of federal "War on Poverty" funds for seven programs to help Texas migrant workers.

If the grant is approved, additional state funds and staff services will bring the total cost of the program to some \$6,000,000, an average of about \$46 for each of the estimated 128,000 Texans who migrate to do seasonal agricultural work.

Included in the programs would be an effort to retrain about 200

**"PATENT PENDING"**

Vaudeville comedians used to have a lot of fun with "that famous old Irishman, Pat Pending." And even today, of course, it is a name that we all encounter often.

What does it mean?

Far less, legally, than you might suppose. It does mean that a patent on the marked product has been applied for. But it does not mean that the patent will necessarily be granted (only about one half of all applications are successful). Nor does it mean that the product cannot be copied freely in the meantime.

Nevertheless, as a practical matter, such a notice may have considerable "scare" effect. It warns the would-be copier that the inventor might get a patent at any moment. And if that happens, the copier may be left high and dry - with his dies cast, his advertising printed, and his merchandise ready to go.

Once a valid patent is issued, the inventor may stop anyone else from making, using or selling the invention. Unless his patent is upset in court, he retains that exclusive power for 17 years (less for design patents).

So exclusive is this power that, generally speaking, no one can make the product even for private, personal use. Not until the 17 years have passed does the invention become free for all, part of the public domain.

Needless to say, such a monopoly is usual in an economy of free private enterprise. But it is granted in the belief that to encourage invention is to benefit society.

It was this belief that led the Constitutional Convention - by unanimous vote - to write a patent provision into the Constitution itself. Since that time, patents have been granted on more than 3,000,000 inventions. For, in the words of Abraham Lincoln:

"The Patent System added the fuel of interest to the fire of genius."

## OLD PHILOSOPHER

**Philosopher Admits His Roof Leaks But Points Out He Has Some High - Toned Company**

Dear editor:

The last time it rained out here, well not only the last time but every time before that for a long time now, my roof leaked.

It's not a bad leak, I mean, it's mostly in one spot and a man with any forethought can place his chair where he won't get splattered, and if he's not forethoughted he can move after the first few drops hit him on the head or stay there and get wet, that's his business, around this place, you've got to be not only smart enough to come in out of the rain but to move away from it after you're in.

Anyway, I've been getting some static about it, little hints from like, "When in thunderation are you going to fix that leak?" but I don't let it bother me.

"Look," I said, "you ever heard of the astrodome in Houston, Texas? That's the air-conditioned football and baseball field covered with a plastic dome.

Well, I added, those big shots spent 30 million dollars building that thing and what happens? The roof leaked. Despite all engineering skill they could hire, the first time it rained the roof leaked.

My house is at least 100 years and 50,000 miles from costing 30 million dollars, but if it and the astrodome both leak, it seems to me the owners of the latter went the round-about way to get to put a pan under a drip.

Or take the New York's World Fair, put on by some of the best brains in this country's biggest city. It and this Johnson grass farm are both a desperate long way from showing a net profit.

I discovered long ago, you don't have to have brains and money have a leaky roof or go in the hole. I'll fix that roof when I get around to it.

## TAKE YOUR PROBLEMS TO CHURCH THIS WEEK

### Millions Leave Them There!

### MY PRIVATE MOVIE

There was a day last summer that I keep tucked away in the back of my mind, like a miniature mental movie all my own. Sometimes, when other days aren't quite as bright as this one was, I take it out and reel off a private showing.

It was a Sunday. We'd been to church, Lee and the three children and I. Then we went home and packed up a big picnic lunch and took it down to the creek. It was one of those perfect summer days poets have written about. Everything tasted better than it could possibly have been. When we'd finished eating, the kids sailed their boats while Lee and I stretched out on the grass and looked up in the blue silk sky, all dotted with fleecy white clouds.

We didn't say anything, but I know that we were both thanking God for all the blessings he'd bestowed on us. I know that we were feeling, just then, particularly at peace with ourselves, and with the universe. I was thinking, too, of our kids as they'd come out of Sunday School that morning, with their bright faces glowing, and I gave a silent vote of gratitude to my parents for having raised me in the Church. Now I was able, in turn, to pass on this priceless heritage to my own children.

In this high pressure, jet-propelled age we're living in, we need so much to guide our children in the right way. Without the aid of the Church I, for one, would be at a total loss—and that afternoon I realized it, with particular emphasis.

I suppose, when you come right down to it, we really didn't do so much, that Sunday. But it was a day that left me with a feeling of family unity, of togetherness . . . I shall never forget.

Sometimes, when things are "at sixes and sevens," a parent needs to take time out to remember just how precious a family is. Whenever I find myself in danger of forgetting—I just dust off my movie and live that Sunday all over again, to myself.

### THE CHURCH FOR ALL . . . ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

## Use Both Hands To Save Time

COLLEGE STATION

Here's a technique for better time management for homemakers.

Train your other hand to become a full-fledged helper whether you are right-handed or left-handed, suggests Mrs. Wanda Meyer, Texas A&M University Extension Service home management specialist.

Time and motion studies indicate that ambidexterity in some tasks can nearly double efficiency - that is, it can cut work time almost in half.

It takes practice, however, cautions, Mrs. Meyer. The "secondary" hand may never become as efficient as the primary one - but most adults who have any manual dexterity at all are capable of teaching it to help.

Efficiency is developed in two ways. The first is in jobs requiring rhythmic motion - where both hands can be doing the same thing at the same time. The second is in jobs requiring real elbow grease - where one hand is normally used at a time so that the dominant hand is able to rest while the other takes over for a while.

The first category, says Mrs.

Meyer, includes such tasks as washing large mirrors or windows. Hold a sponge or cloth in each hand, dip each in thick soap or detergent suds or in a paste of fine scouring powder and water. Use both hands to coat the glass in rhythmic swirls.

Then let both hands wield damp rinse cloths and dry polishing cloths until the glass sparkles. The same technique applies to washing walls or any other large area.

Chores which require energetic attention to smaller areas, such as polishing and waxing furniture, also can be adapted to the dual-hand technique.

## Drink 'Milk Toast'

### Say Dairymen

"Don't forget to take milk along," suggests George Knigge, a dairy farmer of Cypress-Fairbanks (near Houston) in Harris County, who represents all Texas dairy farmers as State June Dairy Month chairman.

The 1965 June Dairy Month program is planned to provide consumers throughout Texas and the national with more knowledge about nature's most nearly perfect food, milk, Mr. Knigge said.

It is the largest food promotion event in the U.S.; one which originates with the American Dairy Assn. and is celebrated by all segments of the dairy industry. Even the cows cooperate ... by giving greater production to fill the consumer demand.

"Dairy days" and other special related events will fill the month of June Calendar throughout the nation. Foreign countries, including England, Australia, Canada, Puerto Rico, the Philippines, and Venezuela have picked up the idea and announced plans for June Dairy Festivals.

Drinking a "milk toast" to dairymen across the land during June Dairy Month would be an appropriate salute to those for whom producing milk is an every day job, Mr. Knigge remarked.

Mr. Knigge is president of the Texas American Dairy Assn. and the South Texas Producers Assn.

Sunday, June 20, will be dairy day at the famous Astrodome when the Houston Astros play the

## Rev. David Erskine

### Ordained Monday

Services for the ordination of the Rev. David Erskine to the Priesthood were held 7:30 p.m. Monday at St. Thomas Episcopal Church, Rockdale.

The Rt. Rev. F. Percy Goddard, Suffragan Bishop of Texas, performed the ordination service. The sermon was by the Rev. Philip M. P. Leech, Rector, St. John's Church, Helena, Arkansas.

Other church officials participating in the ordination service were:

The Reading of the Preface, the Rev. George Lawson Carlisle, Rector, St. Timothy's Church, Lake Jackson;

The Litany, the Rev. William Robert Oxley, Rector, St. Thomas' Chapel, College Station;

The Gospel, the Rev. Charles W. Roberts Jr., Rector, St. Mary's Church, West Columbia.

A reception was held in the Parish House following the service.

Rev. Erskine was named Vicar of St. Thomas' Episcopal Church, Rockdale, and All Saints Episcopal Church, Cameron, in August, 1964. In addition to his church work Rev. Erskine serves as chairman of the Milam Association for Retarded Children. He and his family live in Rockdale.

## Shipments Of

### Aluminum Up

Total aluminum shipments by the domestic industry in March and the first quarter were at record annual rates, according to S. L. Goldsmith Jr., executive vice president of The Aluminum Association.

March shipments were at a record seasonally adjusted rate of 4,313,600 tons, Goldsmith said, 16.6 per cent above the March 1964 rate of 3,700,700 tons, and 9.4 per cent over February's 3,944,500 ton rate.

For the first quarter, the Association executive said, the seasonally adjusted annual shipment rate was 3,935,700 tons, 13.3 per cent over 1964's 3,475,200 ton first quarter annual rate. The 1965 figure was a record, Goldsmith added.

Seasonal adjustment is used by the Association to make year-to-year and month-to-month figures more directly comparable by taking into account variations in working days and seasonal fluctuations, he said.

March shipments represented a seasonally adjusted index of 209.2 (1957-59 = 100), 29.7 points above the 179.5 index in March, 1964, and 17.9 points above the February index of 191.3. The first quarter index, at 190.9, was 22.4 points above the 169.5 index a year earlier, Goldsmith said.

Actual shipments totaled 388,900 tons in March, compared with 320,400 tons the previous March. Actual shipments for the first quarter came to 961,600 tons as against 856,400 a year ago.

## THE HERALD'S FAMILY CORNER

### IT'S A LIVING

-- by Al Johns

## Nola Knows

By Nola White

Dear Nola - I have a brother who is a bachelor, and who likes to take my little boy out. If I don't let him go, my brother stops bringing him presents. Why are bachelors so mean? Wouldn't it be better if he got married and had children of his own?

Mother

Dear Mother - Certainly it would be better if he had children of his own, but he's probably afraid he'll get a wife like you! Most women would be delighted if their brothers (or their husbands) showed that much interest in their children. Where on earth is your brother taking your son that you object so? For Heaven's sake, let him enjoy his little nephew, and let the child enjoy his uncle's attention!

Dear Nola - I would like to have some information from you, but I'm afraid my letter won't be kept confidential. Can you assure me nobody else will read it, and you won't print my name?

Afraid

Dear Afraid - Bless you for writing! Since this is a new column it delights me to assure you that absolutely nobody else will read your letter. You don't even have to sign your real name if it is a letter I can answer in the paper. If you want a personal reply, enclose a stamped, self-addressed envelope. I will be happy to write you directly. Sometimes, when I cannot answer a question from my own knowledge and must call upon a doctor, psychologist, attorney, minister, or professional person, I do so; however, they are not permitted to read your letter. Only I see that I'm so glad you asked this question. Thank you!

Dear Nola - My three year old marriage is not happy. We have a lovely home. We both have good jobs and new cars. Bob will not take me out or show me any affection. We have no children.

Unhappy

Dear Unhappy - If you wrote to get me to tell you to have a baby, you drive your ducks to a bad market. A marriage should be happy and secure before you introduce an innocent, little dependent into it. After all, he's the one who'll suffer most if this marriage ends up on the rocks. You've proved one valuable lesson - happiness is not made of material possessions. Try looking at your marriage as an opportunity to give happiness. Some of it always rubs off on the giver.

Send your letters to Nola Knows, Box 411, Temple, Texas. For a personal reply send a stamped, self-addressed envelope.

## SELF ANALYSIS QUIZ

### Look Before You Leap

(A quiz for women considering marriage)

By Jane Sherrod Singer

It has truly been pointed out that physical attraction, the old lure of physical chemistry, can cloud the eyes and mislead the heart. "I'm in love," you say, and trip blindly down the church aisle, only to discover too late that the man you married was a poor choice. Here are some guiding questions. Answer them seriously before saying I DO.

- |  | YES | NO  |
|--|-----|-----|
| 1. Does he show signs of being jealous toward your friends?  | ( ) | ( ) |
| 2. Does he seem to do little things to make you jealous?   | ( ) | ( ) |
| 3. Does he often use the expression "getting a good break—a bad break?"                                | ( ) | ( ) |
| 4. Does he encourage you to keep your job (or get one) after marriage?                                 | ( ) | ( ) |
| 5. Do you usually make the decisions?  | ( ) | ( ) |
| 6. Are his friends and family people whom you genuinely like?  | ( ) | ( ) |
| 7. Are your conversations stimulating and interesting?   | ( ) | ( ) |
| 8. Is his only goal in life security?  | ( ) | ( ) |
| 9. Does he, either seriously or jokingly, make negative remarks about women?                           | ( ) | ( ) |
| 10. Is he one of those fascinating "lone souls" who goes it alone with a few friends?                  | ( ) | ( ) |
| 11. Does he have some faults that annoy you, but will, you feel, disappear or work out after marriage? | ( ) | ( ) |
| 12. Do you sometimes have the faintest shadow of a doubt whether or not you are in love with him?      | ( ) | ( ) |
| 13. Does he have a sturdy sense of humor?  | ( ) | ( ) |

### DESIRABLE ANSWERS:

- NO. If he is jealous toward your friends, he is likely to resent your children.
- NO. If he picks you with jealousy now, he will not stop after marriage.
- NO. Success seldom comes with "breaks", just hard work and integrity.
- NO. What does he want? A wife or a wage-earner. Popular as working wives are this season, unless you are willing, this attitude can cause trouble.
- NO. If the weight of decision is always yours, you will find yourself thinking of him as a weakening after a time.
- YES. You may not marry his family and friends but you'll have to spend a great deal of time with them. Besides, "birds of a feather flock together."
- YES. If you have nothing to talk about now, you will find that, after a few years of marriage, there will be even less.
- NO. Security is very important, but if it excludes everything else, life can get exasperatingly dull.
- NO. If he thinks poorly of women, what makes you think you are so different?
- NO. Unless you are a lone wolf yourself, you may be lonely later.
- NO. This has been tried since Eve created Adam's appetite for apples. It doesn't work. Usually the faults become more annoying or are exchanged for others, equally disturbing like the man who stopped biting his fingernails because he kept them busy scratching his nose.
- NO. Any doubts says DON'T.
- YES. A sense of humor has spanned more problems and crisis than there are brides over rivers.

### ANALYSIS:

- 13 desirable answers: If you have been honest with yourself, the man sounds like a good mate. Words of caution, however: these are only thirteen questions selected as being very important out of many, many more.
- 9-12 desirable questions: Date if you wish, but wait, you should.
- 4-8 desirable questions: Your chances of a happy marriage seem to be about 50%. Those are poor odds.
- 0-3 desirable answers: A DEFINITE NO! Find someone else. Do not grieve, for it is better that you know the truth now. He will likely find another woman who will give him 100% on this quiz. And you will find the man who comes out with the lucky thirteen points all in his favor.
